

Construction and Application of Music Information Database

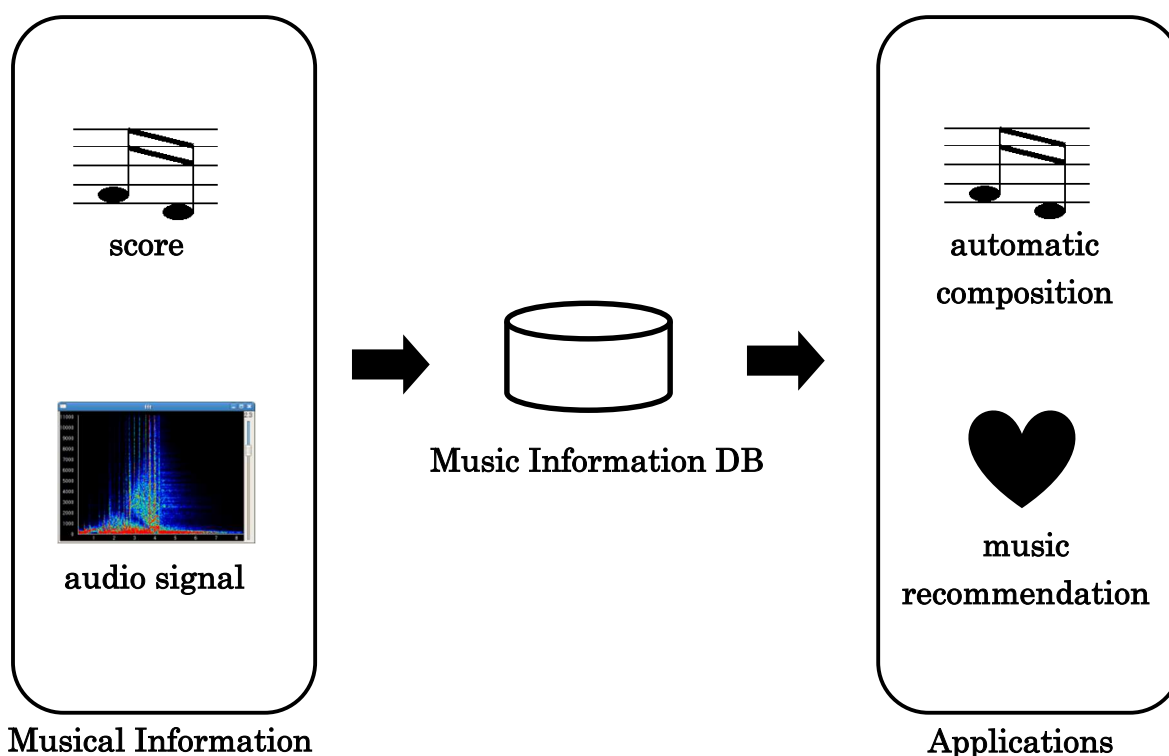

Name	Tomoya Tokairin	E-mail	tokai@hakodate-ct.ac.jp
Status	Associate Professor		
Affiliations	IPSJ, JSCS, IEICE, ASJ		
Keywords	Digital Signal Processing, AI, Data Analysis		
Technical Support Skills	Digital Signal Processing, AI, Data Analysis		

Research Contents

The purpose of the research is :

1. To construct a music information DB based on musical information such as scores and audio signals.
2. To apply the DB to systems such as automatic composition systems and music recommendation system.
